

FURZONE 610 CLIPPER

WARRANTY INFORMATION

1 Year Limited Factory Warranty (LESS SHORTING CORDS, LEVERS, AND HINGES). Please read the **ENTIRE** User Manual before using this clipper. Blades can ONLY be lubricated with blade oil, **no coolants**, as the coolant WILL do damage. Do not spray coolant on the blade while operating the clipper, it can get inside and cause the clipper to get hot. Always remove blade before putting in blade wash solution. Submerging the blade while still attached to the clipper can cause damage. **Any questions or concerns please call 251-232-5353. NO TEXTS.**

Return Policy: Returns must be submitted within 15 Days after delivery if you are not satisfied. No refunds will be given after 15 days. NO EXCEPTIONS. Clipper must be undamaged and packed in the original box with the included Furzone #10 blade and all accessories. After the return, we will inspect the clipper to ensure the clipper was returned in an acceptable condition with all parts and accessories. Only then will we be able to process a refund. The customer will be refunded the clipper price but is required to pay the shipping cost for the return.

PLEASE TAKE TIME TO READ THE FOLLOWING NOTES AS THEY ARE VERY IMPORTANT REGARDING YOUR WARRANTY AND ISSUES WITH THE CLIPPER. WARRANTIES DON'T COVER MIS-USE BY THE USER.

NOTE: To take the lever **out** you must turn the screw to the **RIGHT (CLOCKWISE)**. If you try to loosen the screw by turning it to the left, you will strip the screw. You will be responsible to pay the cost of replacing that bracket that holds the lever (\$30.00 plus labor). There are instructions specifically given on how to replace the lever that are included in your clipper box.

NOTE: Please follow instructions on cord care. Shorted cords are **NOT COVERED** by warranty; it can be prevented by the user. Twisting the cord, or yanking the cord, moves it under the cord clamp inside which can cut into it and causes shorts. To prevent any damage, try not to yank the cord, and frequently ensure the cord is untwisted. To "untwist" the cord hold the cord end closest to the socket plug and carefully, **without having the clipper hit the floor**, allow the clipper to spin on its own until it stop or starts to spin in opposite direction than it originally started as that will show the clipper has fully untwisted. Twisted cords cause power shortages. Shortages can be repaired for a small fee at a service center. A new cord is not always necessary and it is **not covered** by warranty. Please check with the local service center first to see if repair can be made.

NOTE: If a vac attachment was purchased, it is **not covered** by the 1 Year Limited Warranty. If the attachment breaks off the clipper during use, it can only be caused by the user pulling the hose using the clipper, or the hose catching on something. We suggest when moving around the table, hold the hose with your hand, this will prevent strain on the plastic tabs holding the attachment to the clipper.

NOTE: To have your warranty on file, please fill out your warranty card and mail it to the national service center. We will not have your warranty on file unless the card is filled out and mailed in. Proof of purchase with a receipt will not be accepted when dealing with the warranty. Your card can be found in the 610 box.
